

WORKSTATION WITH ROTARY TABLE

The workstation with rotary table effectively responds to the demand for **high productivity** and maximum safety.

The rotary table allows the operator to **load the pieces in masked time**: while the marking is in progress, the operator positions the parts.

The two-button start command, the optical barriers and the Class I enclosure ensure **maximum safety**.

The rotary table workstation is an extremely versatile system: you can choose whether to use the **table with two or six divisions**.

The index drive guarantees **absolute positioning accuracy**.

High productivity thanks to a versatile and precise solution!
